Dimensions: | Windows: 40 KB | Downloads: 50 Anu Script Manager 7.0 Version: Anu Script Manager 7.0 Size: | Windows: 40 KB | Downloads: 50 Anu Script Manager 7.0 Review One of the main reasons for the creation of the new version is to simplify the application in a few clicks. To make this possible, we have created the application interface. By clicking a button, you have the full interface for editing the text (in the right panel), or you can display a new panel for adding new information (in the left panel). In the next section we will explain what is new with the new version. 1.2.1. Better internal databases Anu Script Manager 7.0 has a new internal database to save the information entered in the script. You can now create more than one script with different forms and different records, without losing the previous information. 1.2.2. New Languages You can now add or change the language of the script. 1.3. New Features Anu Script Manager 7.0: 1.3.1. New languages The application is now available in new languages of the popular languages in the world, such as: Italian, French, Spanish, Portuguese, Dutch, English, German, Polish, Russian, Brazilian Portuguese, Chinese, Japanese, Korean, Indonesian, Norwegian, Swedish, Greek, Romanian, Arabic and more. 1.3.2. New database You can now save the script in two different databases, one for a specific user or for everyone. Now the database is the default one, but it is possible to add another one. 1.3.3. History of the script The history of the scripts can be saved and you can open it and add more information if needed. 1.3.4. Working with PayPal You can now add PayPal payments in the script and you can record the data for multiple versions of the script with a single PayPal order. 1.3.5. Editing and adding new information in the script In the previous version, it was necessary to wait for the program to finish the script to add more information. In this version, we have created 82157476af
